

Spanish-English Vocabulary Extraction Ruleset

0. INITIAL INSTRUCTIONS: PROCESSING PDF PAGE(S) OR CHAPTER

0.1 Attached text file – Instructions

Attached is one or more PDF pages (or a complete chapter PDF – typically 10+ pages with grammar explanations, vocabulary lists, verb conjugation tables, example sentences, exercises, and reading passages).

Follow these steps **in order**:

1. **Scan the entire PDF** to identify its structural sections (see 0.2 below)
2. **Extract vocabulary pairs** according to Section 2 (What to Extract) and Section 2.4 (What NOT to Extract)
3. **Apply all formatting rules** from Sections 1–10 to each pair
4. **Check for duplicates** using Section 10.1
5. **Output the complete CSV** in a single code block
6. **Summarize what was extracted** (see 0.4 below)

0.2 Typical Chapter Structure

Most textbook chapters follow this pattern (you may not encounter all sections):

Section	Extract?	Notes
Chapter title & intro	NO	Instructional text only
Grammar/usage rules	NO	Meta-language (but extract vocabulary <i>within</i> rules)
Pronunciation guidance	NO	Unless paired with a specific vocabulary word (Section 13.4)

Section	Extract?	Notes
Vocabulary lists	YES	Core pairs; extract all
Conjugation tables	YES	Each row is a separate entry (Section 6.2–6.4)
Example sentences with translations	YES	Extract the paired translations (Section 11)
Exercises with instructions	PARTIAL	Skip instructions; extract vocabulary lists within exercises
Reading comprehension passage	NO	Narrative text only
Footnoted vocabulary below passage	YES	Extract all footnoted definitions (Section 13.7)
Comprehension questions	NO	Questions are prompts, not vocabulary (Section 13.8)

0.3 Key Extraction Priorities

Process the chapter in this priority order to avoid missing pairs:

1. **Vocabulary lists** (explicitly formatted translations)
2. **Conjugation tables** (each conjugation is a separate entry)
3. **Footnoted vocabulary** in reading passages
4. **Example sentences** with English translations
5. **Exercise vocabulary lists** (ignore instructions and blanks)

0.4 Output Summary Format

After extracting all pairs, provide a **summary statement** like this:

All pairs extracted. No unclear words detected.

****Summary:****

- Vocabulary lists: [X] pairs
- Conjugation tables: [Y] pairs
- Example sentences: [Z] pairs
- Footnoted terms: [W] pairs
- ****Total: [X+Y+Z+W] pairs****

****Sections skipped:****

- Grammar explanations and rules
- Pronunciation guidance
- Exercise instructions
- Narrative reading passages

0.5 When NOT to Use This Full Process

- **Single vocabulary list or short excerpt:** Jump directly to Section 2 (Content Extraction Rules)
- **Just conjugation tables:** Use Section 6 (Handling Verb Conjugations) and extract all rows
- **Clarifying one problematic pair:** Reference the relevant section (e.g., “Section 3.2 for parentheses handling”)

0.6 Reference Sections During Extraction

As you work through the PDF, **reference specific sections** for formatting decisions:

- **Parentheses or brackets confusion?** → Section 3
 - **Multiple English meanings?** → Section 4
 - **Gender markers or plurals?** → Section 5
 - **Verb conjugations?** → Section 6
 - **Articles with nouns?** → Section 5.1
 - **Special characters or accents?** → Section 7
 - **Numbers or ordinals?** → Section 9
-

Now proceed to Section 1 for detailed formatting rules.

1. FORMAT SPECIFICATION

1.1 Output Format

All extracted pairs must follow this exact format:

```
"English";"Spanish"
```

1.2 Quotation Marks

- **REQUIRED:** Both English and Spanish terms must be enclosed in double quotation marks (")
- **NO SPACES:** There are no spaces between the closing quote and the semicolon, or between the semicolon and the opening quote
- **EXAMPLE:** "to dance";"bailar" ✓ | "to dance" ; "bailar" ✗

1.3 Semicolon Separator

- **MANDATORY:** A single semicolon (;) separates English from Spanish with no spaces
 - **PLACEMENT:** Appears directly after the closing quote of the English term and directly before the opening quote of the Spanish term
 - **NEVER:** Use commas, colons, or other delimiters
-

2. CONTENT EXTRACTION RULES

2.1 Pairing Identification

- Extract only Spanish-English translation pairs found in the PDFs
- Pairs appear in two configurations:

- i. **Side-by-side:** Spanish on left, English italicized on right
- ii. **Stacked:** Spanish above English (less common in these textbooks)

2.2 Language Direction

- **Spanish term goes on the right** (after semicolon)
- **English term goes on the left** (after opening quote)
- **NEVER reverse:** Do not write "bailar"; "to dance"

2.3 What to Extract

Extract pairs for:

- **Nouns** (with articles: "the kitchen"; "la cocina")
- **Verbs** (infinitives: "to sing"; "cantar" AND conjugated forms: "I sing"; "yo canto")
- **Adjectives** (with English translations: "tall"; "alto")
- **Adverbs** (e.g., "while"; "mientras")
- **Prepositions** (e.g., "in, on"; "en")
- **Interrogative words** (e.g., "How?"; "¿Cómo?")
- **Phrases and expressions** (e.g., "at the beginning"; "al principio")
- **Numbers** (written out: "twenty-one"; "veintiuno")
- **Days, months, seasons** (e.g., "Monday, on Monday"; "el lunes")

2.4 What NOT to Extract

- **Spanish-only content:** If only Spanish appears with no English translation, skip it
 - **English-only explanations:** Grammar rules, instructions, or meta-language are ignored
 - **Conjugation tables headers:** e.g., "Infinitive," "Stem," "Ending" (these are structural labels, not translations)
 - **Pronunciation notes** (unless paired with a vocabulary word)
 - **Duplicate pairs:** If the same pair appears multiple times in the PDF, extract it only once
 - **Incomplete or fragmented pairs:** If English or Spanish is missing, do not extract
-

3. HANDLING BRACKETS [] AND PARENTHESES ()

3.1 Brackets []

Rule: Convert parentheses in the original text to square brackets in the English translation.

When brackets appear in source:

- Source: "la arqueóloga (archeologist)"
- Extract as: "archeologist";"la arqueóloga"
- If brackets are part of the English meaning, include them:
 - Source: "entrar (en) to enter (in)"
 - Extract as: "to enter [in]";"entrar [en]"

When source has parenthetical clarifications:

- Source: "tomar (a) half"
- This indicates “tomar” can mean “to take” or variations; extract the clearest pairing only
- Extract as: "to take";"tomar" OR "[a] half";"la mitad" (if these are separate translations)

3.2 Parentheses in Source Material

Rule: Replace curved parentheses () with square brackets [] in the extracted format.

Examples:

Source	Extraction
el otoño the autumn, the fall	"the autumn, the fall";"el otoño"
entrar (en) to enter (in)	"to enter [in]";"entrar [en]"
tocar to touch, to play (an instrument)	"to touch, to play [an instrument]";"tocar"
tomar to take, to have (something to drink)	"to take, to have [something to drink]";"tomar"
Fifth Avenue (the fifth avenue)	"Fifth Avenue [the fifth avenue]";"la quinta"

3.3 Optional Clarifications

If parentheses indicate optional variations:

- Source: cómico(a) funny
- Extract only the base form: "funny";"cómico" (the feminine marker is grammatical, not a separate meaning)

3.4 Nested or Complex Brackets

If the original has nested structures:

- Source: "tomar (to have [breakfast, lunch, dinner])"
 - Extract as: "to have [breakfast, lunch, dinner]";"tomar"
 - Keep inner brackets as they clarify the meaning
-

4. HANDLING MULTIPLE ENGLISH MEANINGS

4.1 Comma-Separated Meanings

When a Spanish word has multiple English translations separated by commas, **keep all of them in one pair** separated by commas.

Examples:

- Source: el otoño the autumn, the fall
- Extract as: "the autumn, the fall";"el otoño"
- Source: la noche the night, the evening
- Extract as: "the night, the evening";"la noche"
- Source: saludable healthy, healthful
- Extract as: "healthy, healthful";"saludable"

4.2 Synonyms or Alternative Translations

When multiple translations are offered with equal weight, include all on one line separated by

commas.

Examples:

- Source: pasar to pass (by), to happen, to spend (time)
- Extract as: "to pass [by], to happen, to spend [time]";"pasar"
- Source: leer to read
- Extract as: "to read";"leer" (single meaning — simple extraction)

4.3 Context-Dependent Meanings (Advanced Verbs)

For verbs with multiple meanings depending on context:

Source	Extracti
deber should, ought to, must (plus infinitive), to owe	"should, ought to, must [plus i
ganar to win, to earn	"to win, to earn";"ganar"
llevar to carry, to wear	"to carry, to wear";"llevar"

5. HANDLING ARTICLES AND GENDER MARKERS

5.1 Include Articles with Nouns

Rule: Include the definite or indefinite article when it appears with the noun.

Examples:

- Source: el agua the water
- Extract as: "the water";"el agua"
- Source: la mesa the table
- Extract as: "the table";"la mesa"
- Source: un desorden a mess
- Extract as: "a mess";"un desorden"
- Source: una vez one time, once
- Extract as: "one time, once";"una vez"

5.2 Gender Markers on Adjectives

Rule: Extract only the base form; omit gender/number markers in parentheses.

Examples:

- Source: cómico(a) funny
- Extract as: "funny";"cómico" (ignore the feminine marker)
- Source: sabroso delicious
- Extract as: "delicious";"sabroso" (no marker needed)

5.3 Plural Forms

Rule: Extract plural nouns when they appear as distinct entries; ignore routine plurals in conjugation tables.

Examples:

- Source: los lunes Mondays, on Mondays
 - Extract as: "Mondays, on Mondays";"los lunes"
 - Source: la gente the people
 - Extract as: "the people";"la gente"
-

6. HANDLING VERB CONJUGATIONS

6.1 Infinitive Forms

Rule: Always extract infinitives with the English translation “to [verb]”.

Examples:

- Source: cantar to sing
- Extract as: "to sing";"cantar"
- Source: comer to eat
- Extract as: "to eat";"comer"

6.2 Conjugated Forms in Tables

Rule: Extract each conjugated form paired with its corresponding English pronoun translation.

Format:

"[pronoun] [verb meaning]";"[spanish pronoun] [conjugated verb]"

Examples from conjugation tables:

English	Spanish	Extraction
yo canto = I sing	yo canto	"I sing";"yo canto"
tú cantas = you sing	tú cantas	"you sing";"tú cantas"
él canta = he sings	él canta	"he sings";"él canta"
nosotros cantamos = we sing	nosotros cantamos	"we sing";"nosotros cantamos"
vosotros cantáis = you [pl.] sing	vosotros cantáis	"you [pl.] sing";"vosotros cantáis"
ellos cantan = they sing	ellos cantan	"they sing";"ellos cantan"

English	Spanish	Extraction
Uds. cantan = you [pl.] sing	Uds. cantan	"you [pl.] sing"; "Uds. cantan"

6.3 Conjugation Table Completeness

Rule: Extract all conjugations provided, even if the table repeats the same verb multiple times across pages.

Why? Each conjugation form is a separate vocabulary entry for flashcard study.

6.4 Third-Person Forms with Multiple Pronouns

When the textbook shows that multiple pronouns share the same conjugation:

- Source: `él canta ellos cantan` (he sings, they sing)
- Extract both:
 - `"he sings"; "él canta"`
 - `"they sing"; "ellos cantan"`

7. HANDLING SPECIAL CHARACTERS AND ACCENTS

7.1 Preserve All Accents

Rule: Maintain all Spanish accents and diacritical marks exactly as they appear.

Examples:

- `cantáis` (NOT `cantais`)
- `sé` (NOT `se`)
- `dímelo` (NOT `dimelo`)
- `¿Cómo?` (NOT `Como?`)

7.2 Inverted Question and Exclamation Marks

Rule: Include opening inverted punctuation in Spanish where appropriate.

Examples:

- Source: ¿Cómo está? How are you?
- Extract as: "How are you?";"¿Cómo está?"
- Source: ¿Qué? What?
- Extract as: "What?";"¿Qué?"

7.3 Tildes and Special Vowels

Rule: Always preserve ñ, á, é, í, ó, ú, ü exactly.

Examples:

- niño (NOT nino)
 - mañana (NOT manana)
 - día (NOT dia)
-

8. HANDLING PROPER NOUNS AND PLACE NAMES

8.1 Capitalization

Rule: Preserve capitalization exactly as it appears in source.

Examples:

- Fifth Avenue (capitalized in English)
- Extract as: "Fifth Avenue [the fifth avenue]";"la quinta avenida"
- Sixth Street
- Extract as: "Sixth Street [the sixth street]";"la sexta calle"

8.2 City and Country Names

Extract with English equivalents if provided.

Example:

- Source: México Mexico
 - Extract as: "Mexico";"México"
-

9. HANDLING NUMBERS AND ORDINALS

9.1 Cardinal Numbers

Rule: Write out numbers in English, preserve Spanish spelling.

Examples:

- Source: 0 cero
- Extract as: "zero";"cero"
- Source: 21 veintiuno
- Extract as: "twenty-one";"veintiuno"
- Source: 100 cien
- Extract as: "100";"cien" OR "one hundred";"cien" (both acceptable)

9.2 Ordinal Numbers

Rule: Write out ordinals in English with proper hyphenation.

Examples:

- Source: primero first
- Extract as: "first";"primero"
- Source: segundo second
- Extract as: "second";"segundo"
- Source: veintitrés twenty-three
- Extract as: "twenty-three";"veintitrés"

9.3 Compound Numbers

Rule: Use hyphens in English compound numbers where standard English does so.

Examples:

- "twenty-one";"veintiuno"
 - "ninety-nine";"noventa y nueve"
 - "one hundred and third";"ciento tres"
-

10. DUPLICATE HANDLING

10.1 No Repeat Extraction

Rule: If an identical pair appears multiple times in the PDFs, extract it only once.

Rationale: The same vocabulary word appearing in multiple conjugation tables or example sentences should appear only once in the final CSV.

10.2 Near-Duplicates

If slightly different formulations exist:

- Source 1: "to sing";"cantar"
- Source 2: "singing";"cantar"
- These are different meanings → **extract both** (one is infinitive, one is gerund)

10.3 Tracking Duplicates

When writing output: note if a pair was already extracted earlier in the conversation and skip it.

11. EXAMPLE APPLICATION: COMPLETE WALKTHROUGH

Sample Source Text:

la escuela the school
escolar to study
vosotros estudiáis you [pl.] study
entrañar (to) enter (in)
el otoño the autumn, the fall
¿Quién? (sing.), ¿Quiénes? (pl.) Who?

Extraction Process:

1. **la escuela the school**
 - Contains article + noun + English translation ✓
 - Extract as: "the school"; "la escuela"
2. **escolar to study**
 - Verb infinitive with English translation ✓
 - Extract as: "to study"; "escolar"
3. **vosotros estudiáis you [pl.] study**
 - Conjugated form with pronoun and English equivalent ✓
 - Extract as: "you [pl.] study"; "vosotros estudiáis"
4. **entrañar (to) enter (in)**
 - Parentheses around "to" indicate optional; brackets in output
 - Extract as: "to enter [in]"; "entrañar"
5. **el otoño the autumn, the fall**
 - Multiple English meanings separated by comma ✓
 - Extract as: "the autumn, the fall"; "el otoño"
6. **¿Quién? (sing.), ¿Quiénes? (pl.) Who?**
 - Interrogative with gender/number markers in parentheses
 - Markers are grammar notation, not part of meaning
 - Extract as: "Who?"; "¿Quién?" (could also extract "Who?"; "¿Quiénes?")

Final Output:

```
"the school";"la escuela"  
"to study";"escolar"  
"you [pl.] study";"vosotros estudiáis"  
"to enter [in]";"entrañar"  
"the autumn, the fall";"el otoño"  
"Who?";"¿Quién?"
```

12. QUALITY ASSURANCE CHECKLIST

Before finalizing each CSV output:

- ☐ Every line has exactly one semicolon
- ☐ Both English and Spanish are enclosed in double quotes
- ☐ No spaces around the semicolon
- ☐ Spanish is on the right, English on the left
- ☐ All accents and special characters preserved
- ☐ Parentheses converted to brackets where appropriate
- ☐ No duplicate pairs
- ☐ No Spanish-only or English-only fragments
- ☐ All conjugations from tables are extracted
- ☐ Multiple English meanings are comma-separated on one line
- ☐ Articles are included with nouns
- ☐ Infinitives prefixed with “to”
- ☐ Conjugated forms include pronoun + verb meaning

13. PROCESSING A FULL TEXTBOOK CHAPTER

13.1 Chapter Structure Recognition

When an entire chapter PDF is uploaded, the structure typically follows this pattern:

1. **Chapter title and introduction** (usually short explanatory text)
2. **Grammar or usage explanation** (rules, conjugation patterns, pronunciation guidance)
3. **Vocabulary lists** (core extraction targets)
4. **Conjugation tables for verbs** (comprehensive extraction needed)
5. **Example sentences** (paired Spanish-English)
6. **Exercises** (usually fill-in-the-blank or matching; ignore instruction text, extract only vocabulary in questions)
7. **Reading comprehension passage** (often with footnoted vocabulary definitions)
8. **Comprehension questions** (extract questions with Spanish-English pairs if they exist)

13.2 Extraction Priority

When processing a full chapter, prioritize in this order:

1. **Vocabulary lists** — these are explicitly formatted translation pairs
2. **Conjugation tables** — each row is a separate entry to extract
3. **Example sentences** — extract pairs that appear in context
4. **Reading passage vocabulary** — footnoted translations; apply all rules
5. **Exercise questions** — only extract if they contain Spanish-English pairs (skip instruction text like “Complete the following sentences”)

13.3 Handling Repetition Across Chapter

Rule: A single verb may appear:

- In the infinitive list at the top
- In a conjugation table
- In multiple example sentences
- In exercises

Extract each **distinct form** (infinitive vs. each conjugation), but only once. Do not duplicate the infinitive + all conjugations + example usages of the same verb.

Example:

Source appears as:

cantar (infinitive in vocab list)

yo canto, tú cantas, él canta (conjugation table)

Ella canta bien (example sentence)

Extract as:

"to sing";"cantar"

"I sing";"yo canto"

"you sing";"tú cantas"

"he sings";"él canta"

Do NOT extract "She sings well";"Ella canta bien" (this is a full sentence, not vocabulary)

13.4 Pronunciation Notes in Chapters

Rule: Pronunciation notes (marked with 🗣️ or “Pronunciation Reminder”) are explanatory meta-language and should NOT be extracted, but the vocabulary words they discuss may be extracted if they also appear in vocabulary lists.

Example:

Pronunciation Reminder: The Spanish d is pronounced like the d in English dog when it appears at the beginning of a breath group...

Source: donde, la falda, el conde

Do NOT extract pronunciation explanation.

DO extract vocabulary if it appears elsewhere:

"where";"donde" (IF "donde" appears in a vocab list)

13.5 Grammar Rules and Structural Information

Rule: Skip all instructional text about grammar, conjugation patterns, and language rules. Extract only concrete vocabulary pairs.

Examples to SKIP:

- “All infinitives end in -ar, -er, or -ir”

- “Verbs are considered regular if there is no change in the stem”
- “To conjugate a regular -ar verb, drop the infinitive ending...”
- “The present tense is used to express the English simple present”

Examples to EXTRACT:

- cantar to sing (within this instruction: extract the pair)
- Any Spanish-English translation pair, regardless of context

13.6 Exercise Section Handling

Rule: Skip exercise instructions; extract only Spanish-English vocabulary or question pairs if they appear as distinct translation units.

Example exercise section:

Exercise 5.1

Complete the following sentences with the correct form of the appropriate verb. Choose from the verbs listed below:

bailar, bajar, caminar, cantar, cocinar...

1. Ricardo _____ en la piscina.
2. Ella _____ mucho porque...

Action:

- DO NOT extract: “Complete the following sentences...” (instruction)
- DO extract verbs from the list at the top if not already extracted: "to dance";"bailar" , etc.
- DO NOT extract the numbered blanks (they’re exercises, not vocab)

13.7 Reading Comprehension Passage

Rule: Reading passages are narrative text, not vocabulary lists. However, **footnoted vocabulary definitions** within or below the passage should be extracted.

Example:

Una escuela en México
Es el año mil novecientos sesenta y tres...

°la época period of time
°estar seguro(a) to be sure

Action:

- Skip the narrative paragraph
- Extract the footnoted pairs:
 - "period of time"; "la época"
 - "to be sure"; "estar seguro[a]"

13.8 Questions Following Reading

Rule: Comprehension questions are typically “Answer the following questions in Spanish,” but the questions themselves may contain Spanish-English pairs if they’re teaching questions.

Example:

Preguntas
1. ¿Cómo es Guanajuato?
2. ¿Qué estación del año es?

Action:

- These are exercise prompts, not vocabulary pairs → skip

But if a question contains a vocabulary teaching pair:

1. ¿Quién es el profesor? (Who is the teacher?)

Then extract: "Who is the teacher?"; "¿Quién es el profesor?"

13.9 Output Organization for Full Chapters

When extracting a complete chapter:

1. **Extract in order of appearance** (but consolidate duplicates)
2. **Group output logically** in the final CSV:
 - Vocabulary lists first
 - Conjugations of each verb in sequence
 - Example sentences and phrases
 - Footnoted terms from reading passages
3. **Note any sections skipped** at the end:
 - “All pairs extracted. No unclear words detected.”
 - Or: “Grammar explanations skipped. Pronunciation notes skipped. Exercise instructions skipped.”

13.10 Full Chapter Extraction Template Response

When you provide a full chapter, the extraction response should follow this pattern:

```
```\n\n\"English\";\"Spanish\"\n\"English\";\"Spanish\"\n[... all extracted pairs ...]\n```\n
```

All pairs extracted. No unclear words detected.

**\*\*Summary:\*\***

- Vocabulary lists: [X] pairs
- Conjugation tables: [Y] pairs
- Example sentences: [Z] pairs
- Footnoted terms: [W] pairs
- **\*\*Total: [X+Y+Z+W] pairs\*\***

**\*\*Sections skipped:\*\***

- Grammar explanations and rules
- Pronunciation guidance (unless paired with vocabulary)
- Exercise instructions
- Narrative text from reading passages

---

## 14. REPORTING UNCLEAR OR PROBLEMATIC PAIRS

### 14.1 Definition of “Unclear”

A pair is **unclear** if any of the following conditions apply:

1. **Unreadable text:** The PDF image quality is poor, blurry, or corrupted, making the Spanish or English illegible
2. **Missing translation:** One side of the pair is present but the other is absent or cut off by page boundaries
3. **Ambiguous pairing:** It is unclear which Spanish term corresponds to which English term (e.g., multiple columns misaligned)
4. **Incomplete or fragmented:** The pair is partial—e.g., only “to” without the verb, or a

Spanish word without context

5. **Handwritten or non-standard text:** Annotations, corrections, or handwriting that cannot be reliably interpreted
6. **Context-dependent meaning:** The translation depends on surrounding text that is missing or unclear
7. **OCR errors:** If the PDF has embedded text, OCR corruption may have created gibberish (e.g., “to sing” appears as “to s1ng”)

## 14.2 How to Report Unclear Pairs

When you encounter an unclear pair, **halt extraction of that section** and report it in this format:

[UNCLEAR – Line X, Page Y]

Source text: [exact text as it appears in PDF]

Reason: [one of: unreadable | missing translation | ambiguous pairing | fragmented | handwritten]

Context: [surrounding text or clarification if helpful]

## 14.3 Placement of Unclear Reports

Place all unclear pairs in a separate block **after** the extracted CSV pairs, like this:

```
"English";"Spanish"
"English";"Spanish"
[... all extracted pairs ...]
```

---

**\*\*UNCLEAR OR PROBLEMATIC PAIRS:\*\***

[UNCLEAR – Page 5, line 3]

Source text: el \_\_\_\_\_ the (text obscured by page crease)

Reason: unreadable

Context: appears in vocabulary list

[UNCLEAR – Page 12, after conjugation table]

Source text: vosotros hab|s (OCR corruption visible)

Reason: OCR error

Context: should probably be "vosotros habláis" but text is corrupted

[UNCLEAR – Page 8, Exercise 5.2, question 1]

Source text: ¿\_\_\_\_\_ Ud.? [no English equivalent provided]

Reason: missing translation

Context: appears to be an exercise prompt without a translation pair

## 14.4 Frequency Threshold

**If fewer than 3 unclear pairs in a chapter:** Report them in the [UNCLEAR] block at the end.

**If 3–10 unclear pairs:** Report them in the [UNCLEAR] block AND note in the summary: “X unclear pairs encountered—see section below.”

**If more than 10 unclear pairs in a section: STOP extraction of that section** and ask for clarification before continuing. Example:

STOPPING EXTRACTION: Pages 14–16 have extensive OCR corruption or image quality issues. More than 10 pairs are unreadable. Would you like to:

- a) Re-upload a clearer version of this section?
- b) I can skip these pages and continue with the rest of the chapter?
- c) You can manually clarify these terms?

# 14.5 User Response Options

When you report unclear pairs, the user can:

- 1. **Provide clarification:** “That unreadable word on page 5 is ‘libro’ (the book)”
- 2. **Re-upload:** “Let me scan that page again with better quality”
- 3. **Skip the section:** “Just skip pages 14–16 and extract the rest”
- 4. **Proceed anyway:** “Extract everything you can read, flag the unclear ones”

# 14.6 Handling User Clarification

If the user provides clarification for an unclear pair:

- 1. **Add it to the extracted CSV** with a note
- 2. **Mark it as clarified** in a separate comment block if needed

Example:

```
"the book";"el libro" [clarified by user: page 5 was unreadable]
```

# 14.7 Examples of Unclear vs. Clear

Status	Source	Reason	Action
CLEAR	el agua the water	Both sides present and readable	Extract: "the water";"el
UNCLEAR	el ____ the (image cut off)	Spanish visible, English missing	Report in [UNCLEAR] block
UNCLEAR	la ____ [blurry]	Entire pair unreadable	Report in [UNCLEAR] block
CLEAR	cantar (to sing)	Both sides clear	Extract: "to sing";"cant

Status	Source	Reason	Action
		despite parentheses	
UNCLEAR	yo c@nt0 I sing	OCR corruption in Spanish	Report in [UNCLEAR] block
CLEAR	°lavar to wash	Superscript marker is structural, not part of meaning	Extract: "to wash"; "lavar"
UNCLEAR	¿Quién? (sing./pl.) Who? [context missing]	Unclear if gender markers are part of the pair or just grammatical notation	Report in [UNCLEAR] block if ambiguous

## 14.8 Summary Statement Including Unclear Pairs

Modify the extraction summary (Section 0.4) to include unclear counts:

All extractable pairs extracted. [X] unclear pairs encountered.

**\*\*Summary:\*\***

- Vocabulary lists: [X] pairs
- Conjugation tables: [Y] pairs
- Example sentences: [Z] pairs
- Footnoted terms: [W] pairs
- **\*\*Total extracted: [X+Y+Z+W] pairs\*\***

**\*\*Unclear or problematic pairs: [N]\*\***

- See [UNCLEAR] section below for details

**\*\*Sections skipped:\*\***

- Grammar explanations and rules
- Pronunciation guidance
- Exercise instructions
- Narrative reading passages

---

## 15. Verb Conjugation Entries: Stem Changes, Register Markers, and Subject Conventions

### 15.1 Stem-Change Hints in Curly Braces

When a verb has a stem change, append the change rule in curly braces `{...}` to **every** English entry in the conjugation block. The hint appears on both stem-changed and non-stem-changed rows (nosotros, vosotros) for consistency.

Supported patterns:

- `{e > ie}` — e.g. cerrar, entender, querer
- `{o > ue}` — e.g. almorzar, poder, volver
- `{u > ue}` — e.g. jugar
- `{e > i}` — e.g. pedir, servir, sonreír

Example (cerrar):

```
"I close {e > ie}";"cierro"
"you close [sing, inf] {e > ie}";"cierras"
"he, she, you close [sing, formal] {e > ie}";"cierra"
"we close {e > ie}";"cerramos"
"you close [pl] {e > ie}";"cerráis"
"they close {e > ie}";"cierran"
```

The hints in `{...}` are optional display elements — they can be toggled off in the flashcard app's Settings (hamburger menu).

---

## 15.2 Irregular yo Form Only

When only the yo form is irregular (no stem change throughout), tag the yo row with `[irreg yo]` and leave all other rows untagged.

```
"I hear [irreg yo]";"oigo"
"you hear [sing, inf]";"oyes"
"he, she, you hear [sing, formal]";"oye"
"we hear";"oímos"
"you hear [pl]";"oís"
"they hear";"oyen"
```

---

## 15.3 Register and Number Markers in Square Brackets

Use square brackets `[...]` in the English column to disambiguate person, number, and formality. The Spanish column never includes subject pronouns (yo, tú, él, etc.).

Situation	English tag	Example Spanish
2nd person singular, informal	<code>[sing, inf]</code>	<code>hablas</code>
2nd person singular, formal (Ud.)	<code>[sing, formal]</code>	<code>habla</code>
2nd person plural (vosotros / Uds.)	<code>[pl]</code>	<code>hablan</code>

Bracket tags and curly-brace hints can combine:

```
"you close [sing, inf] {e > ie}";"cierras"
"he, she, you close [sing, formal] {e > ie}";"cierra"
```

## 15.4 The Five Conjugation Rows (Mexican Spanish)

Every verb block produces exactly **five rows**. The *vosotros* form is retained in the Spanish column when the book supplies it, but the English tag is `[pl]` — *vosotros* is not used in Mexican (Latin American) Spanish.

Row	English subject phrase	Notes
1	I verb	yo form
2	you verb [sing, inf]	tú form
3	he, she, you verb [sing, formal]	él/ella/Ud. form
4	we verb	nosotros form
5	you verb [pl]	vosotros/Uds. form; <code>[pl]</code> only

Row 5 uses the *vosotros* conjugation when the book gives it, or the *Uds.* conjugation when *vosotros* is absent.

## 15.5 Spanish Column Conventions

- **Never** include subject pronouns (*yo, tú, él, ella, Ud., nosotros, vosotros, ellos, ellas, Uds.*) in the Spanish column.
- Include accents and special characters exactly as printed: `é`, `í`, `ó`, `ú`, `ü`, `ñ`, `¿`, `¡`.
- For entries using `Ud.` / `Uds.` in the source, the Spanish column contains only the conjugated verb form.
